

Sweeping the country with maintenance

Have you spent a lot of money recently on a brand new synthetic sports pitch? Is it a sand filled/sand dressed surface or perhaps a 3g pitch that is compacted, covered with moss/algae and is now not draining well? Perhaps it now needs some TLC this winter.

LTS has now teamed up with Sweepfast Ltd one of the UK's largest synthetic surface maintenance companies based in Sutton Coldfield in the West Midlands to primarily look after the market in Scotland and the NE/NW of England.

A wide range of remedial action from basic drag brushing to power brushing/grooming to a deep clean which cleans and filters the infill to a full refurbishment of the surface that removes the contaminated sand/rubber and replaces with new is offered. Minor problems like split seams, line marking or just replacing that missing penalty spot on the 5 a-side pitch can also be dealt with.

On going maintenance will improve the performance, player comfort, appearance and the drainage of your synthetic pitch. All types of surfaces catered for. Call us now for a FOC inspection visit.

Don't forget to check our web site – it always being updated

Other services that LTS offer

Not only does LTS supply and install any type of synthetic surface from landscaping to all types of sports – football, hockey, tennis, golf, rugby, MUGA's the company can also offer:

✓Floodlights

Do you have existing sports lighting that need to be upgraded or do you want to install lights for the first time? Working with DC Lighting Services in Dundee one of the leading specialists in this field we can offer a wide range of turn key lighting solutions.

✓Fencing

Again working with market leading companies such as JB Corrie & Co we can offer a wide range of fencing options for any sport. From a completely new installation to an upgrade of existing fencing your requirements can be satisfied.

The low maintenance instant lawn

Are you still spending your weekends in the garden mowing, feeding, weeding, watering and edging?

Maybe it is time to chill out with a new synthetic lawn. LTS can carry out a complete installation start to finish including all base works and removal of the old lawn. It may not be as expensive as you think and it is an investment for many years to come.

LTA mini tennis initiative comes to Stonehaven

Arduthie Primary School has become the first one in Stonehaven to introduce mini tennis to its school playground.

Mini tennis has been the brain child of the LTA (Lawn Tennis Association) to encourage more younger children to take up the sport of tennis and follow in the footsteps of becoming the next Andy Murray.

There are 3 levels – red and the smallest court, orange which is the next step up and ¾ the size of a full court and finally green a full size court. Smaller balls and racquets are used. Kids zone areas can then be added to improve the children's abc's – agility, balance and coordination.

Ruth Sterk the Mini Tennis Coordinator for the nearby Stonehaven Tennis Club said "the LeisureTec team has been very flexible, supportive and responsive to our requests..."

LTS was commissioned by the school to carry out all line marking of the courts using special acrylic paint designed for tarmac surfaces and the kids zone area and are hopeful that others will follow.

Fulford Golf Club install another synthetic walk way

Fulford Golf Club one of England's most famous clubs installed one of LTS's "PlayGrass 20" surfaces a couple of years ago.

They were so delighted they came back to LTS to have another installed.

Once again the sand filled surface was installed over a compacted stone base and was available for use the day after completion.

However as the photo below shows the team did need some additional lighting!!!!
