

the **STRI Programme**

*the measure of quality*

# Your personal invite

STRI cordially invite you to a **FREE** seminar and lunch on

## The STRI Programme

Come and see what the STRI Programme is all about, how you can measure the performance of your greens and track the progress of those greens throughout the year, ultimately improving the playing quality of the greens.

The seminars will consist of a presentation and a practical demonstration of the equipment, taking live data from the course. After lunch, we will look at the data and assess how this could aid the course in improving its playing quality throughout the year, finishing with a Q&A session.

Coffee on arrival at 9.00 am, with the presentation starting at 9.30 am, we aim to finish the seminars by 3.00 pm.

We have been developing the STRI Programme in partnership with 130 golf clubs over the last two years to provide golf clubs with an accurate assessment of greens, through a set of concise tools and measurements:

- Introducing a revolutionary new piece of equipment, the STRI Trueness Meter, which measures the **smoothness and trueness of greens**
- The Clegg Hammer to measure **firmness**
- Theta Meter to measure **moisture**
- Stimpmeter to measure **speed**
- Soil Analysis to measure **organic matter and chemical content**

**A full list of dates and venues can be found on the reverse side of this invite.**

**We have a limited number of spaces at each regional seminar so please call or email us now to guarantee your place on +44 (0)1274 565131 or [programme@stri.co.uk](mailto:programme@stri.co.uk).**
